

MARINE MARKET

CGR Products is a fabricator of sponge and rubber materials for the marine industry. Products include closed cell sponge rubber stripping as well as die cut parts with and without pressure-sensitive adhesive. Extrusions, vibration mounts, fastening systems, grommets, and other molded rubber parts are part of our marine offerings:

1. Extrusions for boat trim. Santoprene and thermoplastic rubber for interior and exterior trim.
2. Bump-ons for cabinet doors.
3. Die cut gaskets or extrusions to seal around hatch covers, bait well covers, etc.
4. Vibration mounts for use on air compressors on large vessels.
5. Molded plugs or grommets used as trim part to seal around cut-through in gel-coat such as steering cable or wiring.
6. Cut materials for swim platforms.
7. Die cut parts for use in exhaust flaps.
8. Closed cell sponge blocks for vibration and sound attenuation.
9. Die cut gaskets to eliminate caulking and to provide seal around cleats, bow rail bases, and deck lighting.
10. 1745-MG sponge stripping for application to fuel and water tanks. The sponge serves as a spacer and is also applied under fuel tank bracing.
11. Sponge stripping as a possible alternative to caulking between the hull and deck.
