

APPLIANCE MARKET

CGR Products can supply directly to manufacturers of commercial and retail appliance manufacturers as well as tiered suppliers. We have a wide selection of products for high temperature, sealing, sound and vibration applications:

1. EPDM sponge material used for control panel gaskets and dust barriers.
2. Neoprene gasketing for sealing surfaces and moisture barriers.
3. Silicone materials used under touch-pads and gauges for cooktops.
4. Open and closed cell foam and mass-loaded vinyl materials for use in sound dampening and sound attenuation areas.
5. Sealing applications for moisture barriers in dryer fans, around electrical components, switches, doors, controls, and between the enclosure and components underneath.
6. PE foam and EPDM/neoprene/SBR blend sponge materials serve as vent and detergent tray gaskets.
7. Vibration mounts for use on internal motors.
8. Die cut gaskets or extrusions to seal around door openings, covers, etc.
